Standard stock doors are not sold as sequentially matched veneered sets. Made to Order doors can be sequentially matched on request.

In addition to the standard stock door veneers, the Made to Order door range allows the specifier complete freedom to choose any veneers that are commercially available.

Veneered doors are supplied with unlacquered concealed hardwood lippings to all edges and are colour co-ordinated to the specified veneer. Exposed lippings are available on request.

The appearance of a veneered flush door may be further enhanced to the specifiers choice by the application of hardwood mouldings or the introduction of grooves into solid wood inlays.

Standard stock and custom made doors are finished in UV cured clear lacquers.

No attempt should be made on-site to strip the lacquer and refinish. Application of stained lacquers to veneers is available on request.

All laminate manufacturers' ranges suitable for door fixings are available for Komfort's custom doors with either exposed or concealed lippings.

Door overpanels are supplied oversize to the door width to facilitate on site fitting.

Credits will not be issued for doors that have already been hung.

At the time of placing order, please supply confirmation of all special size requirements, veneers, veneer cutting, handling etc. to ensure compliance with current lead times.

Other configurations and veneer cuts are available on request.

Confirmed orders for doors cannot be cancelled

A CANCELLATION FEE OF 100% WILL BE APPLIED

Komfort Fire Door Assurance Scheme

Following the introduction of the Regulatory Reform (Fire Safety) Order on 1st October 2006 companies and individuals responsible for business premises are required to carry out a fire risk assessment.

To assist the person responsible for identifying fire protection barriers, Komfort Fire Doors are now

marked on the top edge of the door by means of a tamper proof label issued under the terms of a third party certificated fire performance scheme.

Komfort FD30 Fire Doors also carry installation instructions which should be adhered to in order to achieve the stated fire performance.
